MEMORANDUM FOR: Dr. Bohrer

FROM: [REDACTED]

SUBJECT: Initial Review of the Office of Security  
Recommendations Stemming from the [REDACTED]  
and [REDACTED]

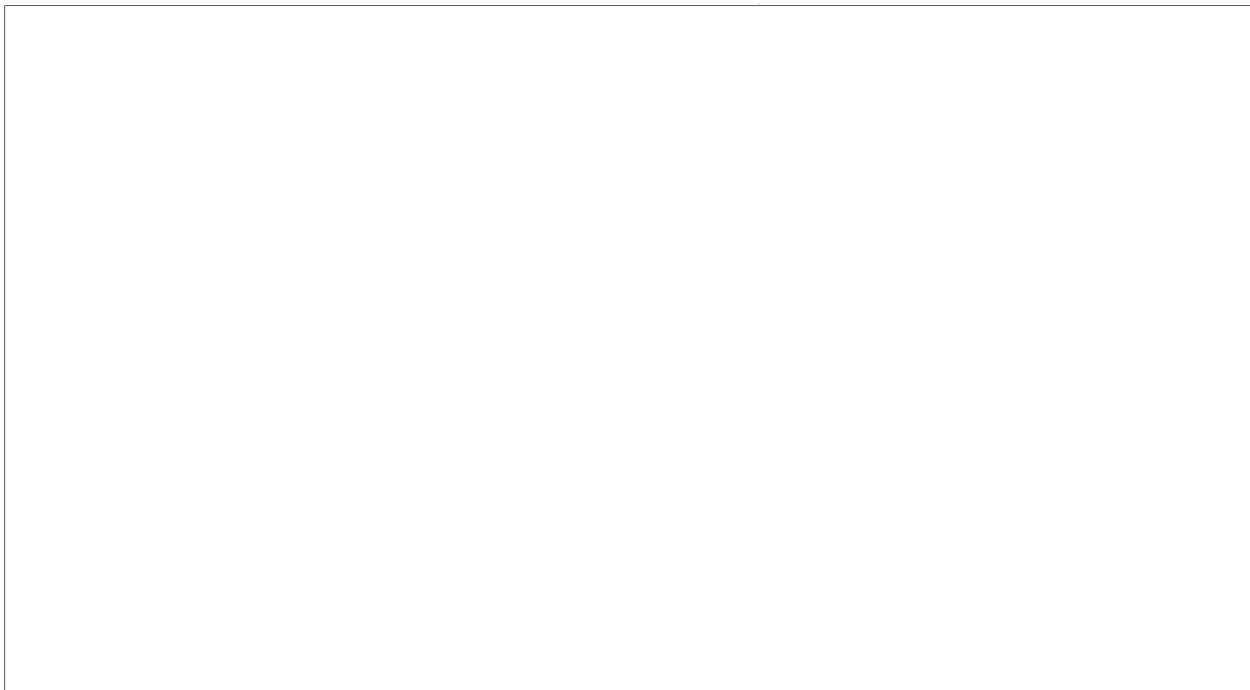

25X1  
25X1

1. I have reviewed the Office of Security's study concerning the subject above with particular reference to those recommendations affecting the Office of Medical Services. The following comments are for your consideration before holding discussions with the Office of Security:

a. With respect to the [REDACTED] there are no specific recommendations which affect us except for those contained on pages 61 and 62 which support a strengthened Personnel Evaluation Board. The report states that "Senior Agency management should place greater reliance on the screening arms of the Agency, particularly the Office of Medical Services, which was quite accurate in the 1959 psychological assessment of [REDACTED]"

2. I have not determined the impact of such a program on our resources and believe it would be premature to do so until the full scale of the program can be determined. I believe we could undertake a pilot study [REDACTED] or some other contractor using currently available resources.
